EXPERIENCE

AI Platform Lead (GenOps Lead)

Grupo Falabella

Mar 2026 - Present Santiago, Chile · Hybrid

Leading the development and technical direction of the AI Developer Platform at Falabella Group, focused on scaling Generative AI and agentic capabilities across the organization.

- Driving platform architecture, technical standards, and delivery to help teams build, integrate, and operate secure, governed, scalable, and production-ready AI solutions.
- Improving developer experience, standardizing AI integrations, and accelerating the adoption of Generative AI, assistants, and agent-based solutions across retail and financial use cases.
- Leading the InnerSource initiative for Kairos, creating a collaborative roadmap and building bridges between teams to scale the AI Developer and Agentic Platform across the organization.

AI Platform Lead (GenOps Lead)

Falabella Financiero

May 2024 - Feb 2026 · 1 yr 10 mos Santiago, Chile · Hybrid

Leader of the GenOps Initiative, responsible for designing the foundational architecture of a unified platform for AI developers at Falabella Financiero — empowering application teams to leverage Generative AI, simplifying access to diverse models, and enhancing security and cost management.

PROFILE

Professional with **15+ years** designing and operating scalable platforms. Today I lead the development and technical direction of the **AI Developer Platform** at Falabella Group, scaling generative AI and **agentic capabilities** across the organization, reinforcing governance, and improving the developer experience. Building on a solid background in DevOps and **Platform Engineering**, I lead AI-focused teams that translate business needs into simple, secure, and reusable technological capabilities.

My focus is on enabling teams: I align visions, define clear working frameworks, and create spaces for collaboration and continuous learning. I promote open-source contribution and continuous improvement. I am constantly seeking tools and practices that reduce time-to-value, optimize costs, and ensure the **quality and reliability** of AI-based solutions.
